

Step 1: Open VS code and create HTML(index.html) and CSS(style.css) file.

Step 2: Make changes in the HTML file to create the structure.

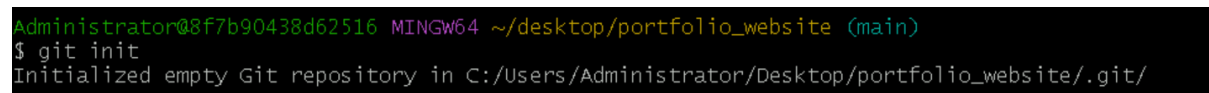

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Personal Portfolio Website</title>
8   <link rel="stylesheet" href="style.css">
9 </head>
10
11 <body>
12   <nav class="navbar">
13     <div class="max-width">
14       <div class="logo"><a href="#">Portfolio</a></div>
15       <ul class="menu">
16         <li><a href="#home" class="menu-btn">Home</a></li>
17         <li><a href="#about" class="menu-btn">About Me</a></li>
18         <li><a href="#teams" class="menu-btn">Projects</a></li>
19         <li><a href="#contact" class="menu-btn">Contact</a></li>
20       </ul>
21     </div>
22   </nav>
23
24   <!-- home section start -->
25   <section class="home" id="home">
26     <div class="max-width">
27       <div class="home-content">
28         <div class="text-1">Hello, my name is</div>
29         <div class="text-2">Prabhakar Kumar Singh</div>
30         <div class="text-3">And I'm a Software Engineer<span class="twoline"></span></div>
```

Step 3: Make Changes in CSS file to add effects to make website more appealing.

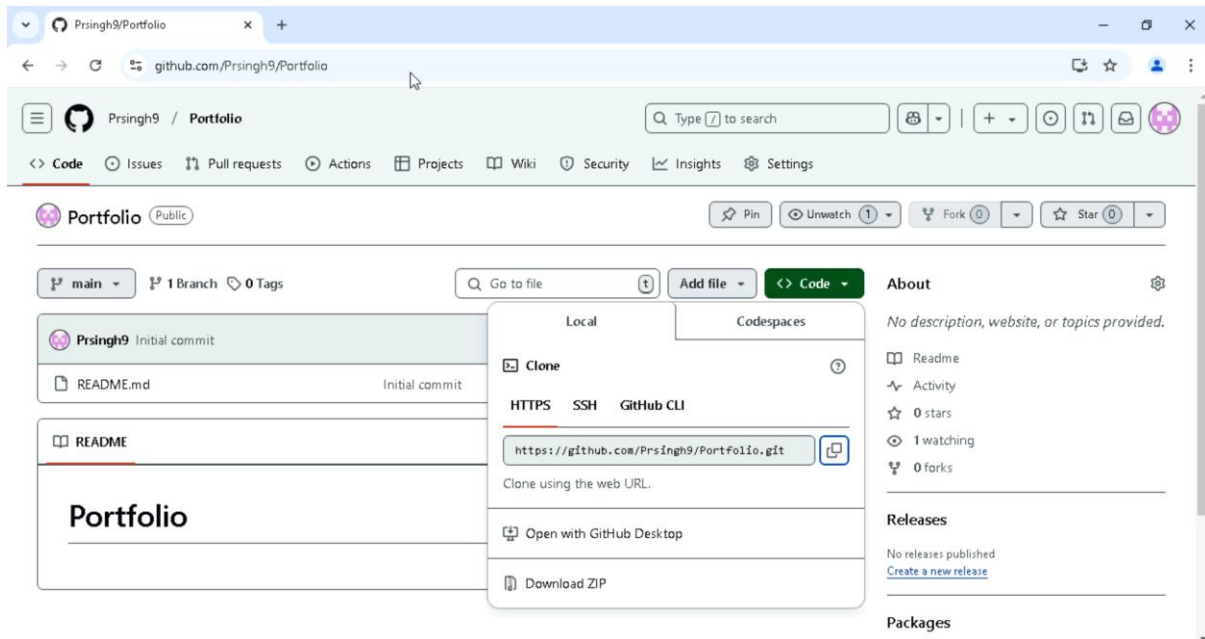

```
4 *{
5   margin: 0;
6   padding: 0;
7   box-sizing: border-box;
8   text-decoration: none;
9 }
10
11 html{
12   scroll-behavior: smooth;
13 }
14
15 /* all similar content styling codes */
16 section{
17   padding: 100px 0;
18 }
19 .max-width{
20   max-width: 1300px;
21   padding: 0 80px;
22   margin: auto;
23 }
24 .about, .teams, .contact, footer{
25   font-family: 'Poppins', sans-serif;
26 }
27 .about .about-content,
28 .contact .contact-content{
29   display: flex;
30   flex-wrap: wrap;
31   align-items: center;
32   justify-content: space-between;
```

Step 4: Open Git Bash and cd to the location of portfolio\_website file and initialize the repository using git init.

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (main)
$ git init
Initialized empty Git repository in C:/Users/Administrator/Desktop/portfolio_website/.git/
```

Step 3: Create repository in GitHub with name Portfolio and copy the link by clicking under code section.

Step 4: Git remote add to sync local and remote repository.

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (master)
$ git remote add origin "https://github.com/Prsingh9/Portfolio.git"
```

Step5: Add the index.html, style.css and remaining files all at once in staging area .

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (master)
$ git add .
```

Step 6: Commit the file from staging area with a message of "initial commit".

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (master)
$ git commit -m "intial commit"
[master (root-commit) 8acc486] intial commit
11 files changed, 528 insertions(+)
create mode 100644 images/banner.webp
create mode 100644 images/book.jpg
create mode 100644 images/ecommerce.webp
create mode 100644 images/profile-1.jpeg
create mode 100644 images/profile-2.jpeg
create mode 100644 images/profile-3.jpeg
create mode 100644 images/profile-4.jpeg
create mode 100644 images/profile-5.jpeg
create mode 100644 images/smoothie.jpg
create mode 100644 index.html
create mode 100644 style.css
```

Step 7: Rename the master branch to main

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (master)
$ git branch -m master main
```

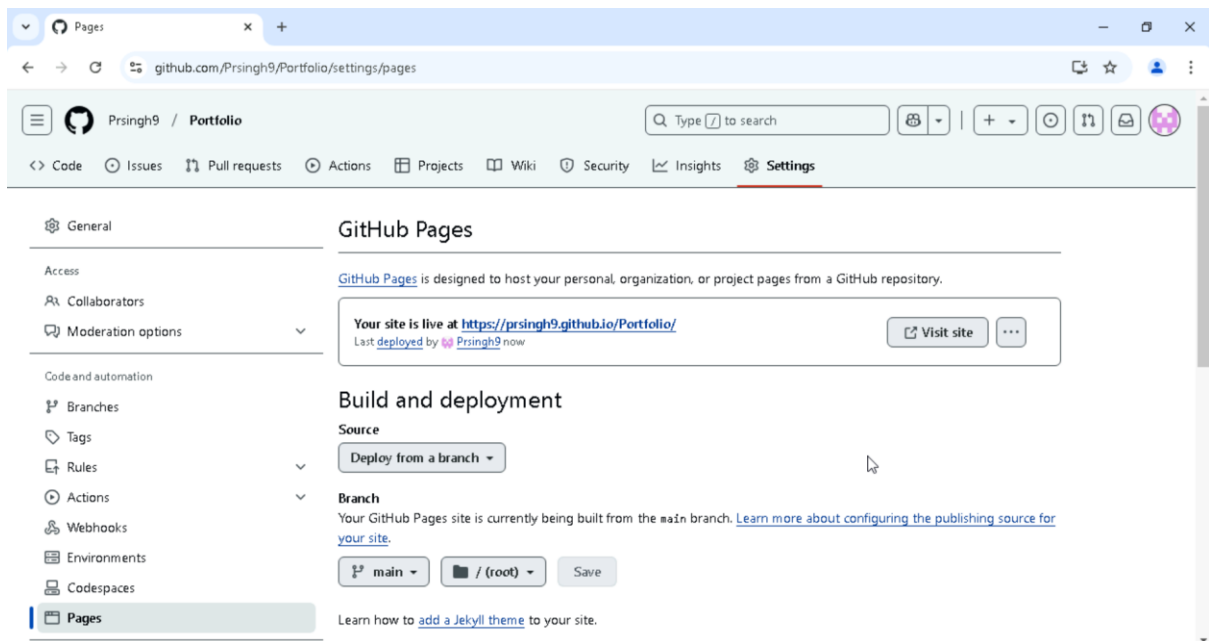

Step 8: Pushing the code from local machine to the remote repository on GitHub.

```
Administrator@8f7b90438d62516 MINGW64 ~/desktop/portfolio_website (main)
$ git push origin main

```

Step 9: Code is successfully uploaded to GitHub

The screenshot shows the GitHub web interface for a repository named 'Portfolio' by user 'Prsingh9'. The repository is public and has 1 branch (main) and 0 tags. The commit history shows an initial commit by 'Prsingh9' 3 minutes ago, which includes files 'images', 'index.html', and 'style.css'. The repository has 0 stars, 1 watcher, and 0 forks. The 'About' section states 'No description, website, or topics provided.' The 'Releases' section shows 'No releases published' with a link to 'Create a new release'. The 'Packages' section shows 'No packages published' with a link to 'Publish your first package'. The 'README' section is currently empty, with a placeholder text 'Add a README'. The Windows taskbar is visible at the bottom, showing the search bar and several application icons.

## Step 10: Deploy the code using GitHub Pages

## Step 11: The portfolio website is deployed and available to visit using the link.
